

2020 Challenging but Rewarding

We were fortunate to be able to safely operate and have a successful 2020 season. Our guests all were able to be tested for Covid 72 hours prior to arriving in Alaska and fly out to the village to enjoy great fishing and relaxation with us. Temperatures were taken morning and evening and logged daily all summer, and asked the obligatory daily questions about how they were feeling. It was all worth it as the Salmon, Halibut, and Ling Cod kept the rods bent and action steady.

We started out very well in June as Woody, Jack and John tested the waters for traveling kings. Bright, fresh and Tasty!

Chignik River King's provided great action, unfortunately we were not allowed a full season as they were unable to accurately count the fish through the Weir. It was excellent when open!

We hooked 25 King's the day before the river was closed!

So we shifted our attention to the Saltwater!

**Halibut and Ling Cod kept us busy
until the Coho's and Kings arrived**

Halibut Fishing was Excellent, Then Coho's and King's joined in

We worked with University of Alaska Fairbanks to conduct a King tagging study and deployed research tags on 20 Kings.

Finished Strong with King's, Coho's, Hali and Ling's

We were very fortunate to be able to operate and have such great fishing and guests this summer. We offer Many Thanks to the City of Chignik for endorsing and facilitating our operation this year. Many operation plans were submitted and approved, and in the end it was all worth it.

We look forward to next season with the hopes that 2021 is much better and to the Pandemic receding and hopefully allowing much easier travel and operations. For now we count our many blessings and are thankful to have shared our summer with wonderful people.
